1. Vendor Registration

Route: /vendor/register

Form Fields

Field	Required	Type	Notes
Your name	✓	text	—
Email or phone	✓	text	—
Password	✓	password	—
Company name	✓	text	—
Business type	✗	text	Placeholder: "Manufacturer, wholesaler, importer..."
Country	✗	text	—

City	✗	text	—
------	---	------	---

Test Cases

#	Test Case	Steps	Expected Result
REG-01	Successful registration	Fill all required fields → Click "Submit registration"	Toast: "Registration submitted. Admin will approve your vendor account." → Redirect to <code>/vendor/login</code>
REG-02	Submit without name	Leave name empty → Submit	Browser HTML5 validation blocks submission
REG-03	Submit without email	Leave email empty → Submit	Browser HTML5 validation blocks submission
REG-04	Submit without password	Leave password empty → Submit	Browser HTML5 validation blocks submission
REG-05	Submit without company name	Leave company name empty → Submit	Browser HTML5 validation blocks submission
REG-06	Duplicate email	Register with an already-registered email	Toast: error message from API (e.g. "Email already exists")
REG-07	Loading state	Click Submit → Observe button	Button shows "Submitting..." and is disabled
REG-08	Navigate to login	Click "Back to vendor login" link	Navigates to <code>/vendor/login</code>

2. Vendor Login

Route: `/vendor/login`

Form Fields

Field	Required	Type
Email or phone	✓	text
Password	✓	password

Test Cases

#	Test Case	Steps	Expected Result
LGN-01	Successful login	Enter valid vendor credentials → Click "Sign in"	Toast: "Logged in successfully" → Redirect to <code>/vendor</code> (dashboard)
LGN-02	Wrong credentials	Enter invalid password → Sign in	Toast: "Login failed" or server message

LGN-03	Empty email	Leave email empty → Submit	Browser validation blocks submission
LGN-04	Empty password	Leave password empty → Submit	Browser validation blocks submission
LGN-05	Loading state	Click Sign in → Observe button	Button shows "Signing in..." and is disabled
LGN-06	Navigate to register	Click "Create supplier account" link	Navigates to <code>/vendor/register</code>

3. Auth Guard & Routing

Test Cases

#	Test Case	Steps	Expected Result
AUTH-01	Unauthenticated redirect	Visit <code>/vendor</code> without login	Redirect to <code>/vendor/login</code>
AUTH-02	No vendor profile redirect	Login as user without a vendor profile → Visit <code>/vendor</code>	Redirect to <code>/vendor/profile</code> for setup
AUTH-03	Auth pages accessible	Visit <code>/vendor/login</code> while not logged in	Page renders normally (no redirect loop)
AUTH-04	Guard message display	Visit protected page without token	Shows "Redirecting to vendor login..." message
AUTH-05	Vendor profile check	Login with token but no vendor profile → Visit <code>/vendor/orders</code>	Shows "Redirecting to vendor profile setup..." → Redirects to <code>/vendor/profile</code>

4. Dashboard

Route: `/vendor`

Widgets / Sections

Widget	Data Displayed	Interactions
Products card	Product count + "Add New Product" link	Link → <code>/vendor/products/new</code>
Rating card	Rating (5) + Followers count	—
Total Order card	Total orders + "View All Order" link	Link → <code>/vendor/orders</code>
Total Sales card	Total sales (BDT) + Last month sales	—
Sales Stat chart	Bar chart by month	Tooltip on hover shows formatted BDT

Category-wise product count	List of categories with product counts	—
Orders (This Month)	New, Accepted, Cancelled, On delivery, Delivered counts	—
Purchased Package	Current package name, limits, expiry	"Upgrade Package" button
Commission Type & Rate	Commission info from admin	—
Money Withdraw	Wallet icon + "Go to payout" button	Link → /vendor/payouts
Shop Settings	Settings icon + "Go to setting" button	Link → /vendor/profile
Payment Settings	Card icon + "Configure Now" button	Link → /vendor/payout-accounts
Sold Amount	Current month sales + Last month	—
Top 12 Products carousel	Scrollable product cards with image, name, price, rating, sales	Left/Right scroll buttons; Click card → /vendor/products/{id}/edit

Test Cases

#	Test Case	Steps	Expected Result
DASH-01	Page loads successfully	Navigate to /vendor	All cards render with data or "—" for loading
DASH-02	Error state	API fails	Shows "Failed to load dashboard. Please refresh."
DASH-03	Loading state	Page is loading	Stat cards show "—"; Sales chart shows "Loading..."; Carousel shows pulse skeletons
DASH-04	Sales chart render	Dashboard has sales data	Bar chart renders with month labels and BDT formatted tooltips
DASH-05	Empty sales chart	No sales data	Shows "No sales data yet"
DASH-06	Top 12 carousel scroll	Click left/right arrows	Carousel scrolls smoothly in the corresponding direction
DASH-07	Top products empty state	No products sold	Shows "No product sales yet"
DASH-08	Quick links work	Click "Add New Product" / "View All Order" / "Go to payout" / etc.	Navigates to the correct page

5. Products — List

Route: `/vendor/products`

Test Cases

#	Test Case	Steps	Expected Result
PLIST-01	Products table displays	Navigate to Products page	Table shows: Name, Approval (badge), Current qty, Base price, Published (toggle), Stock (toggle), Options (Edit/Delete)
PLIST-02	Search products	Type in search box	List filters based on search query
PLIST-03	Empty state	No products exist	Shows "No products yet. Add your first product above."
PLIST-04	Approval badges	Product pending/approved/rejected	Badge shows correct color: green=Approved, amber=Pending, red=Rejected
PLIST-05	Toggle Published	Click publish toggle ON→OFF (Active→Inactive)	Toast: "Unpublished"; Toggle switches off
PLIST-06	Toggle Published	Click publish toggle OFF→ON	Toast: "Published"; Toggle switches on (green)
PLIST-07	Toggle Stock status	Click stock toggle ON→OFF	Toast: "Marked as Stock Out"; Toggle turns red; Label shows "STOCK OUT"
PLIST-08	Toggle Stock status	Click stock toggle OFF→ON	Toast: "Marked as In Stock"; Toggle turns green; Label shows "IN STOCK"
PLIST-09	Edit product	Click "Edit" link	Navigates to <code>/vendor/products/{id}/edit</code>
PLIST-10	Delete product	Click "Delete" → Confirm dialog	Toast: "Product deleted"; Product removed from list
PLIST-11	Cancel delete	Click "Delete" → Click Cancel in confirm	Product remains in list
PLIST-12	Bulk Upload link	Click "Bulk upload" button	Navigates to <code>/vendor/products/bulk-upload</code>
PLIST-13	Add product button	Click "Add new product"	Navigates to <code>/vendor/products/new</code>
PLIST-14	API error state	API returns error	Shows "Failed to load products."

6. Products — Add New

Route: `/vendor/products/new`

Form Fields — Basic Information

Field	Required	Type	Notes
Product name	✓	text	—
Unit (e.g. Pc, Kg)	✗	text	Placeholder: "Pc"
Weight (kg)	✗	number	Default: 0
Minimum purchase qty	✗	number	Default: 1
Tags (comma separated)	✗	text	—

Form Fields — Category (Right Panel)

Field	Required	Type	Notes
Category	✓	dropdown	Populated from API
Subcategory	✓	dropdown	Populated based on selected category
Child category	Conditional	dropdown	Required if child categories exist for selected subcategory
Brand	✓	dropdown	Populated from API

Form Fields — Price & Stock (Dropshipping/Both modes only)

Field	Required	Type
Base price (reseller)	✗	number
Regular price	✗	number
Quantity	✗	number
Low stock warning at	✗	number
SKU	✗	text
Discount	✗	number
Stock visibility	✗	radio (Show quantity / Show text / Hide)

Form Fields — Description

Field	Required	Type
Short description	✗	textarea
Description	✗	textarea

Form Fields — Images

Field	Required	Type
Gallery images	✗	file (multiple, images)

Thumbnail image	✗	file (single, image)
-----------------	---	----------------------

Selling Type

Option	Description
 Wholesale	Tier-based bulk pricing (shows Bulk Pricing table)
 Dropshipping	Single price + stock (shows Price & Stock section)
 Both	Wholesale + Dropshipping (shows both sections)

Bulk Pricing Table (Wholesale / Both)

Column	Type	Notes
Variant (Optional)	text	e.g. "Red / S"
Color Name	text	e.g. "Red"
Color	color picker	—
Min Qty	number	—
Max Qty	number	—
Price	number	Required to add row
Delivery Charge	number	Optional

Test Cases

#	Test Case	Steps	Expected Result
PADD-01	Create product (wholesale)	Fill name, select category/subcategory/brand, selling type=Wholesale, add bulk pricing rows → Save	Toast: "Product created." → Redirect to /vendor/products
PADD-02	Create product (dropshipping)	Fill name, category, brand, selling type=Dropshipping, enter base price, qty → Save	Product created with stock info
PADD-03	Create product (both)	Fill all fields, selling type=Both, add bulk rows + fill price/stock → Save	Product created with both pricing types
PADD-04	Missing required fields	Submit without product name	Browser validation blocks submission
PADD-05	Missing category	Submit without selecting category	Browser validation blocks
PADD-06	Category dropdown cascade	Select a category → Check subcategory options → Select subcategory → Check child categories	Subcategories populate; child categories populate; changing category resets subcategory

PADD-07	Commission display	Select a category that has commission set	Shows "Selected category commission: X%" in the info box
PADD-08	Add bulk pricing row	Fill Price field → Click "+ Add"	Row appears in table with variant, min/max qty, price, color
PADD-09	Add bulk row no price	Leave Price empty → Click "+ Add"	Toast: "Price is required"
PADD-10	Remove bulk row	Click "Remove" on an existing bulk row	Row is removed from table
PADD-11	Auto-increment min qty	Add a row with Max Qty= 10 → Add next row	Next row's Min Qty auto-fills to 11
PADD-12	Image upload	Select thumbnail + gallery images → Save	Product images are uploaded successfully
PADD-13	Saving state	Click Save → Observe	Button shows "Saving..." and is disabled
PADD-14	API validation error	Submit with server-side invalid data	Toast shows first API validation error message
PADD-15	Selling type toggle	Switch between Wholesale ↔ Dropshipping ↔ Both	Correct sections show/hide (bulk pricing for Wholesale; price & stock for Dropshipping)

7. Products — Edit

Route: `/vendor/products/{id}/edit`

Test Cases

#	Test Case	Steps	Expected Result
PEDT-01	Edit page loads	Navigate to edit page for existing product	Form pre-fills with existing product data
PEDT-02	Update product name	Change product name → Save	Toast: success; Product name updates
PEDT-03	Update category	Change category/subcategory → Save	Product category updates; dropdown cascade works
PEDT-04	Invalid product ID	Navigate to <code>/vendor/products/999999/edit</code>	Shows error or "Not found" message

8. Products — Bulk Upload

Route: /vendor/products/bulk-upload

Test Cases

#	Test Case	Steps	Expected Result
BULK-01	Page loads	Navigate to bulk upload page	Page renders correctly
BULK-02	Upload valid file	Upload a correctly formatted file	Products are created/updated in bulk
BULK-03	Upload invalid file	Upload an incorrectly formatted file	Error message displayed

9. Orders — List

Route: /vendor/orders

Filters

Filter	Type	Options
Search	text	Free text search
Status	dropdown	All / Pending / Accepted / Rejected / Shipped to warehouse / Processing / Delivered / Returned
Payment	dropdown	All / Cash on Delivery / Online

Table Columns

Order code (link), Products count, Customer name & phone, Amount (₹), Delivery status (badge), Payment method, Options (View link)

Test Cases

#	Test Case	Steps	Expected Result
ORD-01	Orders load	Navigate to /vendor/orders	Table displays orders with all columns
ORD-02	Search filter	Type in search box	Results filter by order code / customer
ORD-03	Status filter	Select "Pending" from dropdown	Only pending orders shown
ORD-04	Payment filter	Select "Cash on Delivery"	Only COD orders shown
ORD-05	Combined filters	Set status + payment + search	Results filtered by all criteria

ORD-06	Pagination	Navigate to page 2	Next page of orders loads; page info updates
ORD-07	Previous/Next disabled	On first/last page	Previous/Next button disabled appropriately
ORD-08	Click order code	Click invoice ID link	Navigates to <code>/vendor/orders/{id}</code>
ORD-09	Click View	Click "View" link	Navigates to order detail
ORD-10	Empty state	No orders	Shows "No orders found."
ORD-11	Error state	API error	Shows "Failed to load orders."
ORD-12	Status badge colors	Orders with different statuses	Delivered=green, Cancelled/Rejected=red, Accepted=emerald, Shipped=blue, Pending=amber

10. Orders — Detail & Actions

Route: `/vendor/orders/{id}`

Sections

- **Order Info:** Date, Delivery date, Status (badge), Courier live status, Warehouse sent at, Payment, Tracking number, Shipped at, Tracking link, Customer note
- **Shipping / Customer:** Customer name, phone, address
- **Your Items table:** Product (image + name + code), Price, Qty, Fulfillment status (badge), Tracking, Total
- **Vendor subtotal:** Sum total at bottom

Action Buttons (conditionally shown)

Button	Condition	Action
Accept	Status is Pending/Processing	Sets order to "Confirmed"
Reject	Not already rejected/cancelled/delivered	Sets order to "Canceled" with optional reason prompt
Send to warehouse	Accepted + not yet warehouse-sent + not rejected/delivered	Marks order as sent to warehouse
Add / update tracking	Not rejected/delivered	Opens tracking modal

Tracking Modal Fields

Field	Type	Notes
Order tracking number	text	Single tracking for whole order

Per-item tracking	text × N	One input per line item
Dropship checkbox	checkbox	"Hide my branding on packing / label"

Test Cases

#	Test Case	Steps	Expected Result
ODET-01	Detail page loads	Click View on a valid order	All sections display order info, customer info, line items
ODET-02	Accept order	Click "Accept" on a Pending order	Toast: "Order accepted"; Status badge updates to Accepted/Confirmed
ODET-03	Reject order	Click "Reject" → Enter reason → OK	Toast: "Order rejected"; Status badge turns red
ODET-04	Reject without reason	Click "Reject" → Leave reason empty → OK	Order still rejected (reason is optional)
ODET-05	Send to warehouse	Click "Send to warehouse" on accepted order	Toast: "Order sent to warehouse"; Button disappears; "Warehouse sent at" timestamp appears
ODET-06	Add order tracking	Click "Add / update tracking" → Enter tracking number → Save	Toast: "Tracking updated"; Tracking number shown in Order Info
ODET-07	Add per-item tracking	Open tracking modal → Enter per-item tracking numbers → Save	Tracking numbers shown per line item in the table
ODET-08	Dropship flag	Check "Dropship" checkbox → Save tracking	Fulfillment type set to "dropship" for line items
ODET-09	Empty tracking submit	Open modal → Leave all empty → Save	Toast: "Enter at least one tracking number or mark as dropship."
ODET-10	Cancel tracking modal	Open modal → Click "Cancel"	Modal closes without changes
ODET-11	Invalid order ID	Navigate to <code>/vendor/orders/abc</code>	Shows "Invalid order ID."
ODET-12	Order not found	Navigate to <code>/vendor/orders/999999</code>	Shows "Order not found." with "Back to orders" link
ODET-13	Button visibility rules	Check accepted+shipped orders	Accept/Reject/Send to warehouse buttons hide appropriately per status
ODET-14	Back to orders link	Click "Back to orders"	Navigates to <code>/vendor/orders</code>

11. Campaign Events

Campaigns List — `/vendor/campaigns`

#	Test Case	Steps	Expected Result
CMP-01	Campaigns load	Navigate to page	Campaign cards displayed in grid (banner, title, dates, countdown, stats)
CMP-02	Countdown timer	Active campaign with future end date	Timer ticks every second showing "Xd Xh Xm Xs"
CMP-03	Expired campaign	Campaign end date has passed	Badge shows "Ended" in red; CTA says "View Details"
CMP-04	Registration closed	Registration deadline passed	Registration badge shows "Closed" in red
CMP-05	Empty state	No campaigns	Shows "No active campaigns available" with icon
CMP-06	Error state	API error	Shows "Failed to load campaigns."
CMP-07	Campaign count badge	Campaigns loaded	Shows "X campaigns" pill in header
CMP-08	Click campaign card	Click "Submit Deal" / "View Details"	Navigates to <code>/vendor/campaigns/{id}</code>

Campaign Detail — `/vendor/campaigns/{id}`

#	Test Case	Steps	Expected Result
CMP-09	Detail page loads	Navigate to campaign detail	Banner, info grid (Start, End, Time Left, Registration status), submitted products table
CMP-10	Submit product	Click "Add Product" → Search → Select → Enter campaign price → Submit	Product appears in submitted products table with calculated discount %
CMP-11	Submit without price	Select product but leave Campaign Price empty → Submit	Submit button remains disabled
CMP-12	Already submitted product	Product already in campaign	Product shows "Already added" and is disabled in picker
CMP-13	Remove submitted product	Click "Remove" on submitted product → Confirm	Product is removed from submitted list

CMP-14	Cancel remove	Click "Remove" → Cancel confirm	Product remains
CMP-15	Discount preview	Enter campaign price	Shows "Discount: X% OFF (from ₺Y)" text
CMP-16	Search in picker	Type product name in picker search	Products filter by name
CMP-17	Registration expired	Campaign registration deadline passed	"Add Product" button is hidden
CMP-18	Campaign not found	Invalid campaign ID	Shows "Campaign not found" with back link
CMP-19	Breadcrumb navigation	Click "Campaigns" in breadcrumb	Navigates back to /vendor/campaigns

12. Category-wise Discount

Route: /vendor/category-discount

Table Columns

Column	Description
#	Row index
Category	Icon + name
Discount	Number input (0–100) with "%" suffix
Discount Date Range	Start date + End date inputs
Action	"Set" button

Test Cases

#	Test Case	Steps	Expected Result
CDISC-01	Page loads	Navigate to page	Categories listed with current discount values
CDISC-02	Set discount	Enter 10 in discount, set date range → Click "Set"	Toast: "Discount updated"
CDISC-03	Set 0% discount	Enter 0 → Click "Set"	Toast: "Discount updated"; Effectively removes discount
CDISC-04	Search categories	Type category name in search	Table filters matching categories
CDISC-05	No categories	Empty list	Shows "No categories found."

CDISC-06	Saving state	Click "Set" → Observe	Button shows "..." while saving
----------	--------------	-----------------------	---------------------------------

13. Earnings

Route: `/vendor/earnings`

Summary Cards

Card	Color
Total sales	Blue
Commission	Amber
Net earnings	Emerald
Pending (orders)	Gray
Available balance	Green
Paid out	Indigo

Earnings Table Columns

Order (invoice), Product, Line total, Commission, Net, Status (badge: paid/available/pending)

Status Filters

All, Pending, Available, Paid

Test Cases

#	Test Case	Steps	Expected Result
EARN-01	Page loads	Navigate to Earnings	Summary cards + earnings table display
EARN-02	Summary values	Check card values	Values match API: total sales, commission, net, pending, available, paid
EARN-03	Filter by status	Click "Pending" tab	Only pending earnings shown
EARN-04	Filter by Available	Click "Available" tab	Only available earnings shown
EARN-05	Filter by Paid	Click "Paid" tab	Only paid earnings shown
EARN-06	Reset filter	Click "All" tab	All earnings shown

EARN-07	Pagination	Navigate pages	Table paginates correctly
EARN-08	Empty state	No earnings	Shows "No earnings yet. Sales will appear here."
EARN-09	Payouts link	Click "Payouts" button in header	Navigates to /vendor/payouts

14. Payouts

Route: /vendor/payouts

Sections

1. **Balance & Request:** Available balance, pending request amount, amount input, payout account selector, "Request payout" button
2. **Payout Requests table:** Date, Amount, Account, Status (approved/rejected/pending)
3. **Payout History table:** Date, Amount, Reference, Status (paid/other)

Test Cases

#	Test Case	Steps	Expected Result
PAY-01	Page loads	Navigate to Payouts	Balance shown, request form visible, tables load
PAY-02	Request payout	Enter valid amount → Click "Request payout"	Toast: "Payout request submitted"; Request appears in requests table
PAY-03	Amount exceeds balance	Enter amount > available balance → Request	Toast: "Amount cannot exceed available balance"
PAY-04	Zero/negative amount	Enter 0 or -5 → Request	Toast: "Enter a valid amount"
PAY-05	Pending request exists	Already have a pending request → Request again	Toast: "You already have a pending payout request"
PAY-06	No payout accounts	No accounts configured	Shows "Add a payout account" link
PAY-07	Select payout account	Multiple accounts exist → Select from dropdown	Selected account displayed in request
PAY-08	Earnings link	Click "Earnings" button	Navigates to /vendor/earnings
PAY-09	Request disabled states	Balance=0 OR pending request exists	Button disabled with reduced opacity
PAY-10	Status badges	Requests with different statuses	Approved=green, Rejected=red, Pending=amber

PAY-11	Pagination (requests)	Multiple pages of requests	Tables paginate correctly
PAY-12	Pagination (history)	Multiple pages of history	Tables paginate correctly

15. Payout Accounts

Route: /vendor/payout-accounts

Account Card Info

Channel type (Bank/Mobile wallet/Other), Provider name, Account name, Account number, Routing number, DEFAULT badge, INACTIVE badge

Modal Fields

Field	Required	Type	Notes
Type	✓	dropdown	Bank / Mobile wallet / Other
Provider / Bank name	✗	text	e.g. bKash
Account name	✓	text	—
Account number	✓	text	—
Routing number	✗	text	For banks
Use as default	✗	checkbox	—

Test Cases

#	Test Case	Steps	Expected Result
PACC-01	Page loads	Navigate to Payout Accounts	Account cards display
PACC-02	Add account	Click "Add account" → Fill form → Click "Add"	Toast: "Payout account added"; New card appears
PACC-03	Missing required fields	Submit without account name or number	Toast: "Account name and account number are required"
PACC-04	Edit account	Click "Edit" → Change fields → Click "Update"	Toast: "Payout account updated"
PACC-05	Delete account	Click "Remove" → Confirm	Toast: "Payout account removed"; Card disappears
PACC-06	Cancel delete	Click "Remove" → Cancel	Account remains

PACC-07	Cancel modal	Click "Cancel" in modal	Modal closes without saving
PACC-08	Set as default	Check "Use as default" → Save	Account card shows "DEFAULT" badge
PACC-09	Channel types	Select Bank / Mobile wallet / Other	Label shows correctly on card
PACC-10	Empty state	No accounts	Shows "No payout accounts yet." with "Add your first payout account" link
PACC-11	Payouts link	Click "Payouts" button	Navigates to /vendor/payouts

16. Profile & KYC

Route: /vendor/profile

Profile Form Fields

Field	Required	Type
Company name	✓	text
Business type	✗	text
Contact person	✗	text
Contact email	✗	email
Contact phone	✗	text
Country	✗	text
City	✗	text
Address line	✗	text

KYC Document Form

Field	Required	Type	Notes
Document type	✓	text	e.g. "nid", "trade_license"
Document number	✗	text	—
Document file	✗	file	Image or PDF

Status Badges

- Account status: Approved (green) / Pending (amber) / Rejected (red)
- Verified badge: Enabled (sky blue) / Not granted (gray)

Test Cases

#	Test Case	Steps	Expected Result
PROF-01	Profile loads	Navigate to <code>/vendor/profile</code>	Form pre-fills with existing vendor data
PROF-02	First-time setup	New vendor (no profile) → Navigate	Form pre-fills with user info (name, email, phone)
PROF-03	Save profile	Change company name → Click "Save profile"	Toast: "Vendor profile saved"
PROF-04	Missing company name	Clear company name → Save	Browser validation blocks (required field)
PROF-05	Submit KYC document	Fill document type → Upload file → Click "Submit KYC"	Toast: "KYC document submitted"; Document appears in submitted list
PROF-06	KYC list display	Already submitted documents	Lists document type, number, date, status badge (approved/pending/rejected)
PROF-07	KYC no documents	No documents submitted	Shows "No documents submitted yet."
PROF-08	Account status display	Vendor is approved/pending/rejected	Correct colored badge displayed
PROF-09	Verified badge display	Vendor has/hasn't verified badge	Shows "Verified badge enabled" or "Verified badge not granted"
PROF-10	Saving state	Click Save → Observe	Button shows "Saving..." and is disabled

17. Product Reviews

Reviews List — `/vendor/reviews`

Filters

- Rating dropdown: 1–5 Stars
- Product name search

Table Columns

#, Product Name (with image), Rating (stars + value), Reviews count (+ "X new" badge), Options ("View Reviews" button)

Test Cases

#	Test Case	Steps	Expected Result
REV-01	Page loads	Navigate to Reviews	Products with reviews listed in table

REV-02	Filter by rating	Select "5 Stars"	Only 5-star rated products shown
REV-03	Search by name	Type product name	Table filters by name
REV-04	View Reviews	Click "View Reviews" on a product	Navigates to <code>/vendor/reviews/{id}</code>
REV-05	New review badge	Product has new/unread reviews	Red badge shows "X new"
REV-06	Empty state	No reviewed products	Shows "No product reviews found."
REV-07	Star rendering	Products with different ratings	Stars filled correctly (e.g. 3.5 → 4 stars filled)

Review Detail — `/vendor/reviews/{id}`

#	Test Case	Steps	Expected Result
REV-08	Reviews display	Navigate to product review page	Individual reviews with customer info, rating, comment load

18. Shipping Methods

Route: `/vendor/shipping`

Table Columns

Name, Type (flat/weight/zone), Rate, Default (Yes/—), Active (Yes/No), Actions (Edit/Delete)

Modal Fields

Field	Required	Type	Notes
Name	✓	text	e.g. "Standard delivery"
Type	✓	dropdown	Flat rate / By weight / By zone
Base rate (₺)	✓	number	—
Per kg rate (₺)	Conditional	number	Only visible when type = "weight"
Min order (₺)	✗	number	—
Max order (₺)	✗	number	—
Description	✗	text	—
Default method	✗	checkbox	—
Active	✗	checkbox	Default: checked

Test Cases

#	Test Case	Steps	Expected Result
SHIP-01	Page loads	Navigate to Shipping	Shipping methods table displays
SHIP-02	Add flat rate method	Click "Add method" → Fill name + type=Flat + rate → Save	Toast: "Shipping method created"; Row appears
SHIP-03	Add weight-based method	Type=By weight → Fill base rate + per kg rate → Save	Row shows rate + per kg suffix
SHIP-04	Missing name	Submit without name	Toast: "Name is required"
SHIP-05	Invalid rate	Enter negative rate → Save	Toast: "Enter a valid rate"
SHIP-06	Edit method	Click "Edit" → Change name → Save	Toast: "Shipping method updated"
SHIP-07	Delete method	Click "Delete" → Confirm	Toast: "Shipping method deleted"; Row removed
SHIP-08	Cancel delete	Click "Delete" → Cancel confirm	Method remains
SHIP-09	Cancel modal	Click "Cancel" in modal	Modal closes without saving
SHIP-10	Per kg rate visibility	Switch type between Flat / Weight / Zone	Per kg rate field only visible for "weight"
SHIP-11	Set as default	Check "Default method" → Save	Column shows "Yes" for default
SHIP-12	Toggle active	Uncheck "Active" → Save	Column shows "No" (gray); method inactive
SHIP-13	Empty state	No methods	Shows "No shipping methods yet." + "Add your first shipping method" link

19. Warehouses

Route: /vendor/warehouses

Warehouse Card Info

Name, Label, Default badge, Inactive badge, Address lines, City/State/Postcode, Country

Modal Fields

Field	Required	Type
-------	----------	------

Name	✓	text
Label	✗	text
Country	✗	text
State	✗	text
City	✗	text
Postcode	✗	text
Address Line 1	✗	text
Address Line 2	✗	text
Set as default warehouse	✗	checkbox

Test Cases

#	Test Case	Steps	Expected Result
WH-01	Page loads	Navigate to Warehouses	Warehouse cards display
WH-02	Add warehouse	Click "Add Warehouse" → Fill name + address → Create	Toast: "Warehouse created"; Card appears
WH-03	Missing name	Submit without name	Toast: "Warehouse name is required"
WH-04	Edit warehouse	Click "Edit" → Change fields → Update	Toast: "Warehouse updated"
WH-05	Delete warehouse	Click "Delete" → Confirm	Toast: "Warehouse deleted"; Card removed
WH-06	Cancel delete	Click "Delete" → Cancel confirm	Warehouse remains
WH-07	Set as default	Check "Set as default" → Save	Card shows "DEFAULT" badge
WH-08	Inactive badge	Warehouse is inactive	Card shows "INACTIVE" badge
WH-09	Address display	Warehouse with full address	All address fields render correctly
WH-10	Cancel modal	Click "Cancel"	Modal closes without saving
WH-11	Empty state	No warehouses	Shows "No warehouses yet." + "Create your first warehouse" link

WH-12	Inventory link	Click "← Inventory" button	Navigates to /vendor/inventory
-------	----------------	----------------------------	--------------------------------

20. Notifications

Component: VendorNotificationCenter (in layout header)

Test Cases

#	Test Case	Steps	Expected Result
NOTIF-01	Notification bell visible	Logged in with vendor profile	Notification bell icon visible in header
NOTIF-02	Bell hidden on auth pages	Visit /vendor/login	No notification bell
NOTIF-03	Bell hidden without profile	Logged in but no vendor profile	Notification bell hidden/disabled
NOTIF-04	Click notification bell	Click bell icon	Notification dropdown/panel opens
NOTIF-05	Mobile notification	On mobile view	Notification bell appears in mobile header

21. Sidebar & Navigation

Navigation Sections

Section	Items
Main	Dashboard, Reports
Orders	All orders, Shipping methods
Campaigns	Campaign Events
Products	Products, Add new product, Category-wise discount, Product reviews
Earnings & Payouts	Earnings, Payouts, Payout accounts
Inventory	Inventory, Warehouses
Account	Profile & KYC

Test Cases

#	Test Case	Steps	Expected Result
NAV-01	Sidebar renders	Logged in → View sidebar	All 7 sections with correct items displayed

NAV-02	Active state	Navigate to a page	Corresponding nav item highlighted with dark bg + white text
NAV-03	Navigation works	Click each nav item	Navigates to correct route
NAV-04	Sidebar hidden on auth pages	Visit <code>/vendor/login</code>	Sidebar not visible
NAV-05	Mobile hamburger menu	On mobile → Click hamburger icon	Sidebar slides in from left
NAV-06	Mobile close menu	In mobile → Click X or overlay	Sidebar closes; body scroll restores
NAV-07	Mobile nav route change	In mobile sidebar → Click a nav item	Sidebar closes; page navigates
NAV-08	Brand link	Click "SelfShop Supplier" logo	Navigates to <code>/vendor/dashboard</code>
NAV-09	Mobile profile icon	On mobile → Click user profile icon	Navigates to <code>/vendor/profile</code>

Cross-Cutting Concerns

Responsiveness

#	Test Case	Expected Result
RESP-01	All pages render on mobile ($\leq 640\text{px}$)	No horizontal overflow; hamburger menu replaces sidebar
RESP-02	All pages render on tablet ($640\text{--}1024\text{px}$)	Tables scroll horizontally if needed; layout stacks appropriately
RESP-03	All pages render on desktop ($\geq 1024\text{px}$)	Sidebar visible; full table views; grid layouts

Error Handling

#	Test Case	Expected Result
ERR-01	Network failure during API call	Toast error shown; page remains functional
ERR-02	Session expired mid-action	Redirect to <code>/vendor/login</code>
ERR-03	API returns 500 error	Error state shown on page (red text or error panel)

Loading States

#	Test Case	Expected Result
---	-----------	-----------------

LOAD-01	Initial page load	Skeleton/pulse animations or "Loading..." text shown
LOAD-02	Button loading states	Buttons show "..." / "Saving..." / "Submitting..." text and are disabled

Total test cases: ~140+

Modules covered: 21 sections across 15+ feature areas
